of said third side, said third side oriented transversely with respect to said first side.

Claim 5 (original): The insert according to claim 1,

wherein said frame forms at least two chambers; and

further comprising a web separating said two chambers from one another, and said web is connected to only one of said first and second sides.

Claim 6 (original): The insert according to claim 5, wherein said web has an unconnected end which is not connected to said first side.

Claim 7 (original): The insert according to claim 6, wherein said web is connected to said indentation formed in said second side.

Claim 8 (original): The insert according to claim 6, wherein said unconnected end of said web can be brought into contact with said first side by reversible elastic deformation of said frame.
